

QBXNet is a company builder that focuses on helping entrepreneurs build frontier tech startups.

The company was founded in 2014 by a group of people who were frustrated by the obstacles startup founders faced in emerging technology fields. The inaccessibility of high-quality tech people and the corporate mindset of most software development companies along with a passion for building outstanding tech products laid the founding stones of QBXNet.

We like to call ourselves a “fast idea factory” – a company built by entrepreneurs, for entrepreneurs. We focus on realizing innovative and exploratory software ideas and our clients are no stiff large organizations, but dynamic and energetic entrepreneurs with ambitious ideas. We work across a spectrum of cutting-edge technologies including:-

1. Virtual Reality
2. Augmented Reality
3. Internet of Things (IoT)
4. iOS Apps
5. Web Apps

We regularly engage with the newest technologies both on the software as well as on the hardware side.

If you want to find out more about what we do specifically, you can do so at www.qbxnet.com.
