Figma · Xd · Ps · Ai · Id · Sketch · invision

Projects

1 EyeMart

EyeMart is an image recognition technology App, designed to bring up relevant information related to objects it identifies using visual analysis by the targeted images. When directing the phone's camera at an object, Eyemart App will attempt to identify the object, and show relevant search results, web pages, and information.

2 Electricity Meter reading detection

The process of traditional sub-meter reading involves the deployment of trained personnel by the organization to survey every single house and other properties in their list to note down consumption metrics. This data is later aggregated manually and bills are prepared to be sent to the respective consumers for further perusal.

Blockchain
Portfolio

We Provide **BlockChain** Design/Developement Services In Following Indusries.

Health Care	Travel & Tourism	E-Commerce
Finance Tech	Education	On-Demand

Our Tech Stack For App Development:

MySQL · PyTorch · dj · Vue · MySQL · React · Angular · JS · node JS · MongoDB

Ethereum · Binance · Web3.js · MetaMask · Truffle · Ganache · Solidity · **BaaS**

Design Tools We Use:

Figma · Xd · Ps · Ai · Id · Sketch · **in**vision

Projects

1 Rrinkeby

Before any project is started on the Ethereum blockchain (or before any changes are made to the blockchain itself), a version is deployed to the Ethereum test network ("Rinkeby"), which simulates Ethereum. Tires before they became an important asset. Ether and tokens on testnet are easy to get and have no real value, but having 10,000 ether or 1 trillion tokens on Rinkeby is fun.
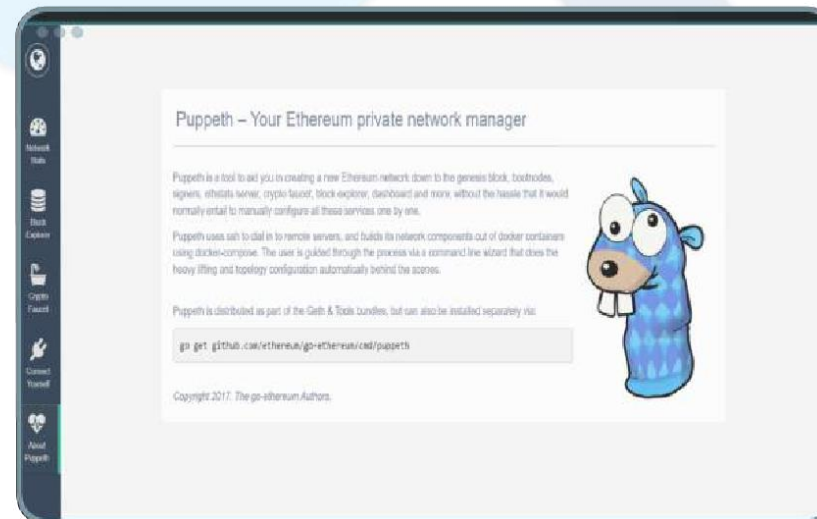

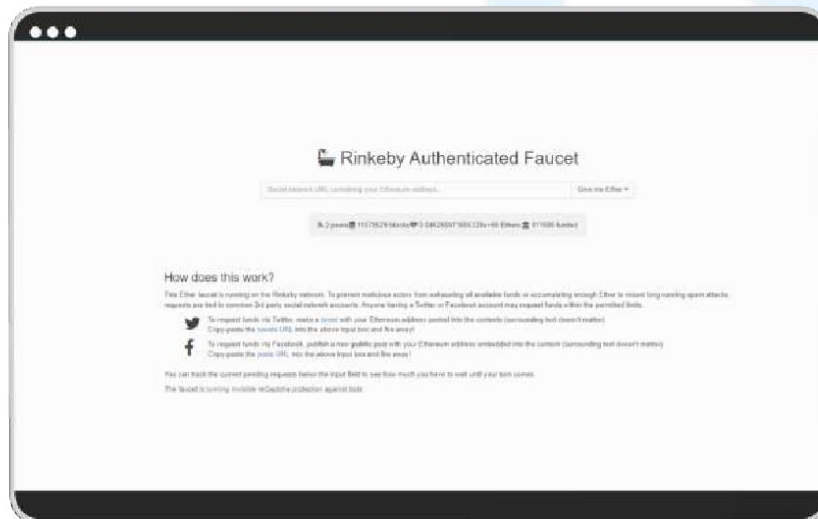

2 LENDO(nft marketplace)
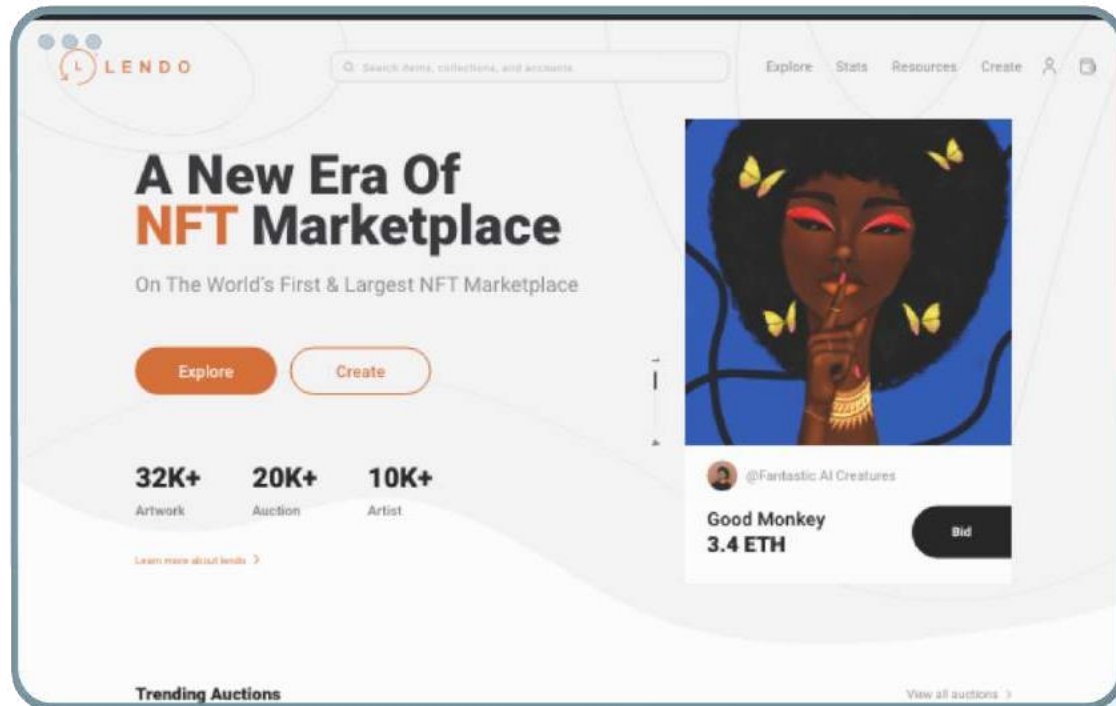

Lendo is an NFT marketplace, a platform for buying and selling NFTs. The NFT Marketplace is nothing more than a place where digital assets are stored. The market has various NFT marketplaces where you can buy and sell digital assets. But not all markets are the same. Each has its own unique features and functionality, so you should find the marketplace that's right for you.
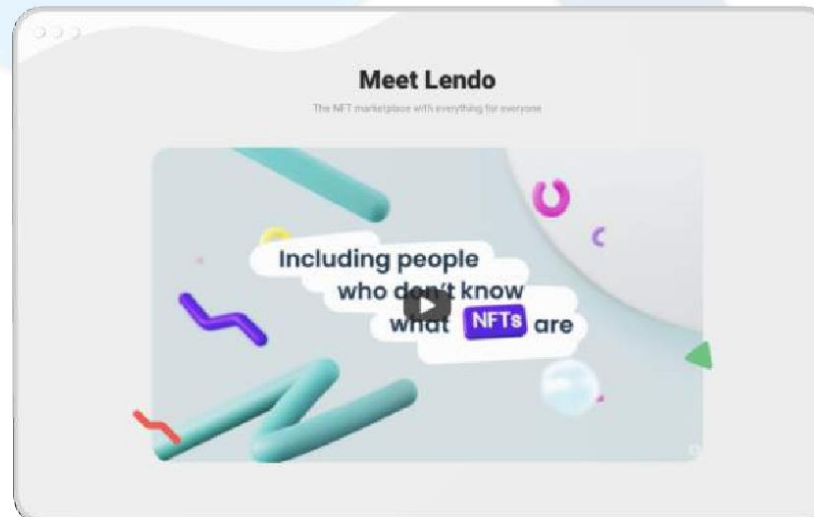

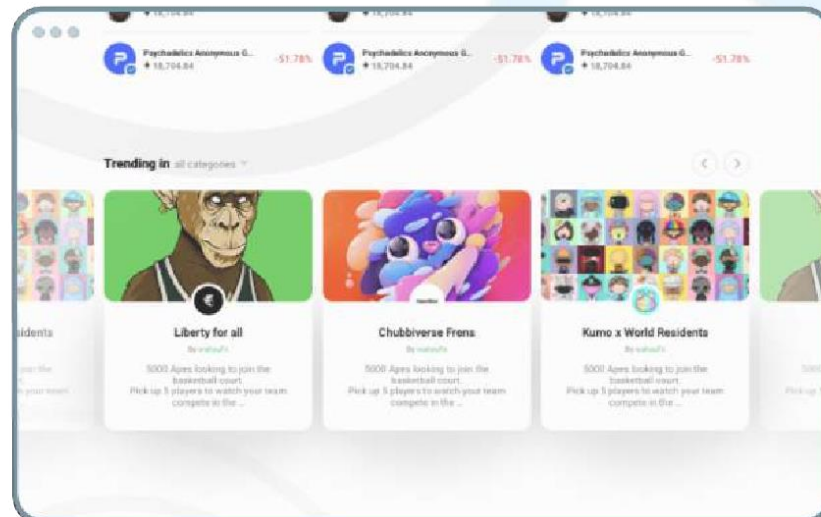

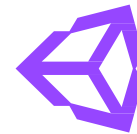

Game Development
Portfolio

Internet of things IOT **Portfolio**

1 IOT smart home

How to Easily Set Up Smart Home Devices with Amazon Alexa Setting up smart home devices to be controlled by Amazon Echo can be difficult. Typically, you'll need to enable your device and connect it to your home network for Echo to recognize it. However, Amazon offers a program called Certified for Humans that allows you to do all of this with the Alexa app. how to set everything up. Products marked Human Certified can be activated by being recognized by Alexa on your wireless network. Amazon's Certified for Humans page lists some compatible devices, but currently there is no complete list of certified devices to search.
